THE HISTORY OF ENGLISH AND WELSH WHISKY
England and Wales, unlike Scotland or Ireland, have not traditionally been renowned for whisky production. In the late 19th century, however, there were at least four whisky distilleries in operation – Lea Valley Distillery in London, Bristol Distillery, and Bank Hall and Vauxhall distilleries, both in Liverpool.

In around 1905, the last of these distilleries still in operation, Lea Valley Distillery, closed its doors. The success of Scotch north of the border saw larger companies focus their attention on Scottish whisky, mothballing distilleries south of the Scottish border, and moving production to Scotland. Whisky production did not begin in England again until 2003.

In England and Wales, new-make spirit must be matured for a minimum of three years in wooden casks before it can legally be called 'whisky', and so, as some of these distilleries are new, they are still laying down their spirit. However, many of these distilleries also produce a range of other spirits, many of which have won awards, so you are sure to find something to make your visit worthwhile.
